CAPT. ROBERT BROWN'S WHALING GUN, PATENT BOMB LANCES AND GUN HARPOONS. FTER SEVERAL YEARS LABOR AND A experimenting upon whales, on the whaling ground, with his apparatus, combined with the advantages of being a practical whaleman, the Patentee has been enabled to obtain an instrument in form of a Bomb Lance, which for utility and effectiveness cannot be excelled.

The attention of Agents and Officers of whale-ships is called to the following testimonials.

SAN FRANCISCO, January 10, 1856.

CAPT. R. BROWN—Sir. I take this opportunity to inform you that we used those Bomb Lances we bought of you, and found them to be of great nenefit in capturing whales amongst The first whale that we used the Bomb Lance on was killed The first whale that we used the Bomb Lance on was killed in the following manner:—The boat went alongside of the whale and the boat-steerer fired a Bomb into him and then fastened to him with a gig iron: the Bomb was heard to explode, and the whale did not blow after the Bomb exploded. The above-mentioned whale was in the ice, and it is our opinion that we should not have got that whale and many others that we did get, if it had not been for your Bomb Lances, and we fully recommend them to the attention of those fitting out whale ships.

Respectfully yours,

Thomas Wall, Master bark George.

HONOLULE, March 17, 1856. CAPT. ROBERT BROWN—My dear Sir: I used your Bomb Lances in taking a whale, north, the past season, which made 250 bbls. of oit. We never could have taken him without said Lances, as our boats could not get near enough to use the com

Yours Respectfully,
G. L. Cox, Master whale-ship Magnolia. CAPT. ROBERT BROWN—Dear Sir : I take this opportunity to inform you that I used your Bombs on the voyage in the ship Herald, and found them effective in taking whales, and would recommend them to all whalemen, and especially around the ice. I also used the harpoon and got most of the whales by your Guns and apparatus.

OFFICE OF THE PANAMA RAIL-ROAD COMPANY, 
NEW YORK, July 20, 1857.

The Panama Rail-Road Company takes this method of informing these interested in the Whaling business, of the advantages offered by the Railroad across the 1sthmus of Panama, for the shipment of Oil from the Pacific to the United States, and for sending outfits and supplies from the United States, and for sending outfits and supplies from the United States to Panama.

The Railroad has been in regular and successful operation for more than two years, and its capacity for the transportation of every description of merchandise, including Oil, Provisions, &c., has been fully tested. The attention of several Captains of whaleships has recently been turned to the subject of shipping their oil from Panama to New York during the present season, and the Panama Rail-Road Company has made arrangements to afford every facility which may be required for the accomplishment of this important object. A Pier, 450 feet long, has been built in the bay of Panama, to the end of which Freight Cars are run to receive cargoes from lighters or vessels lying alongside, and deliver the same alongside of vessels at Aspinwall. Vessels of from 200 to 360 tons can lie at the Pier with safety, grounding in the mud at low water.

The vessels to and from Aspinwall are fast-sailing brigs, be longing to the Rail-Road Company, and the Company is prepared to receive oil at Panama and deliver it in New York, under through Bills of Lading at the rate of seven cents per gallon, if received at the Pier, and eight cents per gallon if received in the harbor from ship's tackies, charging for the capacity of the casks, without allowing for wantage. For whalebone, one and one-half cents per pound. This charge covers every expense from Panama to New York, in case the oil is sent through the Superintendent or Compercial Agent of the Panama Rail-Road Company, insurance excepted. The freight may be made payable on the Istimus or in New York at the option of the shipper.

The vessels of the Compan Whaleships in the Pacific Ocean.
